EDUCATION

University of Ottawa	Ottawa, ON
<i>Bachelor of Science in Computer Science, Minor in Management</i>	<i>Sept 2022 – Aug 2026</i>
Centennial College	Scarborough, ON
<i>Diploma in Mechanical Engineering Technician- Design</i>	<i>Jan 2018 – Apr 2019</i>
Central Tool Room (Post Grade 10)	Ludhiana, India
<i>4-year Diploma in Mechanical Engineering (Tool & Die)</i>	<i>July 2013 – June 2017</i>

EXPERIENCE

Software Developer and Project Management Support (Part-Time)	Jan 2026 – Present
<i>Department of National Defence (DPMSO)- Government of Canada</i>	<i>Ottawa, ON</i>
• Scaled Power Apps Change Tracker beyond delegation limits (2K- 5K records) using optimized data architecture, improving performance and reliability. • Developing a Student Information Management System with self-service portal and real-time profile management for efficient recruitment workflows. • Integrated SharePoint lists, role-based access, and Power automate workflow to streamline, approvals, tracking and data management.	
Software Developer and Project Management Support	Aug 2025 – Dec 2025
<i>Department of National Defence (CMLU)- Government of Canada.</i>	<i>Ottawa, ON</i>
• Led migration from IBM Rational Change to a custom Change Tracker, supporting full ETL (Extract, Transform, Load) processes and ensuring data accuracy. • Built Power Apps solutions (Checklist App, CMLU Lessons Learnt System-CLLS) to standardize workflows and improve process compliance. • Developed Power BI dashboards to deliver real-time insights and enable data-driven decision-making for shareholders.	
Software Developer and Project Management Support	Jan 2025 – Aug 2025
<i>Department of National Defence (DPMSO)- Government of Canada</i>	<i>Ottawa, ON</i>
• Designed performance-optimized Power BI dashboards for risk register and Change Tracker, enabling real-time monitoring and analysis. • Replaced legacy Excel and IBM tools with a scalable Power Apps + Power Automate change management system. • Translated complex datasets into actionable insights, improving reporting efficiency and business decision-making.	
CNC Programmer	Oct 2019 – Sep 2022
<i>A&C Tool Inc.</i>	<i>Bowmanville, ON</i>
• Programmed CNC boring, lathe, and milling machines (Fanuc control) using Autodesk Fusion 360, machining tight-tolerance components for nuclear reactor assemblies supporting Ontario Power Generation (OPG) projects. • Ensured high-quality production work, meeting specifications, and contributing to a 20% reduction in rework instances. • Demonstrated a strong work ethic by consistently developing 7-8 programs per day and contributing to 15 % increase in overall production efficiency.	

Field Technician- Bike Share Transit (Part-Time)

Mar 2021 – Sep 2021

Shift Transit

Toronto, ON

- Updated over 100 work orders daily using a handheld device, enhancing task management efficiency.
- Applied systematic troubleshooting approach, **reducing downtime by 30%** and optimizing equipment performance.
- Maintained accurate records for future reference, ensuring comprehensive documentation of completed work.

PROJECTS

Personal Portfolio Project | *HTML, CSS*

- Built a responsive portfolio website to showcase projects and skills.
- Designed clean UI with structured navigation and modern styling.
- Link: [Ketan Kumar Portfolio](#)

CMLU Lessons Learnt System (CLLS) | *Power Apps, Power Automate*

- Built a centralized lessons learned system to capture, categorize, and analyze project insights across a major DND initiative.
- Implemented structured submission, validation workflows, and advanced search to improve knowledge reuse and decision-making.

Checklist App | *Power Apps, Power Automate*

- Developed a process driven checklist app with toggle-based controls to enforce step-by-step compliance and data accuracy.
- Integrated **SharePoint as the backend** and automated review workflows to ensure data integrity and streamlined approvals.

Change Tracker App (CDRL & RCR) | *Power Apps, Power Automate, Power BI*

- Designed two enterprise apps to manage change requests, replacing IBM Rational Change and improving tracking efficiency.
- Implemented transmittal logs, notifications and reporting tools to reduce manual effort and enhance visibility.
- Received **Innovation Award from Chief of Staff (Materiel)** for developing a cost-effective solution, saving ~\$300K annually by replacing legacy systems with in-house Microsoft 365 tools.

Cycling Event Application | *Java, SQL, Lucidcharts*

- Built a scalable full-stack web app supporting 100+ concurrent users for event registration and management.
- Designed system architecture and optimized performance for high-traffic usage.

Hotel Reservation System | *MySQL, JavaScript, React*

- Developed a full-stack reservation system with a relational database handling **500+ booking** efficiently.
- Created 6+ ER diagrams and optimized schema, improving performance and delivering a responsive UI.

TECHNICAL SKILLS

Microsoft Power Platform: Power Apps, Microsoft Power Automate, Power BI, Microsoft Lists, Microsoft Loop & Microsoft Project.

Languages: Java, Python, Scheme, HTML, CSS

Frameworks: React, Flask

Developer Tools: Git, DrRacket, AutoCAD, MasterCAM, AutoFusion, Microsoft Excel.

Database Management: MySQL, SQL(Postgress)
